Gyeongtae Kim awarded an SPIE Optics and Photonics Scholarship

BELLINGHAM, Washington, USA — **Gyeongtae Kim** has been awarded a 2025 Optics and Photonics Scholarship by SPIE, the international society for optics and photonics, for potential contributions to optics, photonics, or a related field.

Kim is a PhD candidate in mechanical engineering at Pohang University of Science and Technology (POSTECH), South Korea, advised by Professor **Junsuk Rho**. Kim's research primarily focuses on metasurface-based computational imaging, bridging nano-optics and artificial intelligence. Through innovative optics, sensor, and AI technologies, he aims to develop high-dimensional imaging systems that capture rich-scene information from 2D intensity to wide field-of-view, time-of-flight, and polarization. Beyond research, Kim supports the optics community through interdisciplinary academic collaboration and commercialization efforts via start-ups that are focused on nano-optics and high-throughput nanofabrication.

This month, the Society is awarding \$323,000 in scholarships to 74 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Successful applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by SPIE Senior Member **Brian Primeau**.

Since this program began in 1978, SPIE has distributed more than \$7.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education as well as to the future generations of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, we have invested more than \$25 million in the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
