Megh Rathod awarded an SPIE Optics and Photonics Scholarship

BELLINGHAM, Washington, USA — **Megh Rathod** has been awarded a 2025 Optics and Photonics Scholarship by SPIE, the international society for optics and photonics, for potential contributions to optics, photonics, or a related field.

Rathod is currently pursuing a PhD in biomedical engineering at the University of Toronto. His research focuses on characterizing the impact of melanin on optical sensors, such as pulse oximeters and anemia-monitoring tools, and creating universally designed wearable sensors with equitable and accurate performance. “I am honored to be awarded this scholarship from SPIE and grateful to my mentors,” said Rathod. “I am excited to continue my scientific pursuits and am motivated to contribute to the field of wearable optical sensing. This scholarship will support me to continue making my unique research contributions and inspire others to pursue optics.”

This month, the Society is awarding \$323,000 in scholarships to 74 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Successful applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by SPIE Senior Member **Brian Primeau**.

Since this program began in 1978, SPIE has distributed more than \$7.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education as well as to the future generations of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, we have invested more than \$25 million in the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
