## Mina Yoo awarded an SPIE Optics and Photonics Scholarship

BELLINGHAM, Washington, USA — **Mina Yoo** has been awarded a 2025 Optics and Photonics Scholarship by SPIE, the international society for optics and photonics, for potential contributions to optics, photonics, or a related field.

Yoo is a graduate student at the University of Arizona's Wyant College of Optical Sciences. She is a member of the Large Optics Fabrication and Testing (LOFT) group, where she conducts research under the guidance of Dr. **Daewook Kim**. As a graduate research assistant, Yoo has developed expertise in optical metrology technology, optical system alignment, and finite element analysis (FEA) simulations. She continues to pursue cutting-edge developments in optical metrology and optical mechanics. "I am very grateful to be awarded this SPIE scholarship and will continue working toward my goal of becoming an accomplished optical engineer," said Yoo.

This month, the Society is awarding \$323,000 in scholarships to 74 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Successful applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by SPIE Senior Member **Brian Primeau**.

Since this program began in 1978, SPIE has distributed more than \$7.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education as well as to the future generations of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, we have invested more than \$25 million in the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development.
