## Noémie Filion-Patoine awarded an SPIE Optics and Photonics Scholarship

BELLINGHAM, Washington, USA — **Noémie Filion-Patoine** has been awarded a 2025 Optics and Photonics Scholarship by SPIE, the international society for optics and photonics, for potential contributions to optics, photonics, or a related field.

Noémie is a third-year undergraduate student in engineering physics at Polytechnique Montréal. She has been engaged in biophysics research since the end of her first year, participating in an international collaboration between the UK and Canada. Her work focuses on developing a quantitative approach to study protein aggregates associated with neurodegeneration, comparing the statistical distribution and conformation of microscale structures in diseased brain tissue. In addition to her research activities, Noémie was elected as vice president of the Polytechnique's Optica-SPIE Student Chapter, where she leads optics and photonics outreach activities.

She is eager to continue studying biomedical optics in her graduate studies.

This month, the Society is awarding \$323,000 in scholarships to 74 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Successful applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by SPIE Senior Member **Brian Primeau**.

Since this program began in 1978, SPIE has distributed more than \$7.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education as well as to the future generations of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, we have invested more than \$25 million in the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development.
