Reid Master awarded an SPIE Optics and Photonics Scholarship

BELLINGHAM, Washington, USA — **Reid Master** has been awarded a 2025 Optics and Photonics Scholarship by SPIE, the international society for optics and photonics, for potential contributions to optics, photonics, or a related field.

Master, a Texas A&M University School of Engineering Medicine student pursuing both an MD and an MEng, is advancing cancer diagnostics through AI-driven biophotonic imaging. Contributing to a federally funded project on multimodal optical histopathology, he helped refine image preprocessing and extract diagnostic parameters from second harmonic generation imaging. Master is also leading a new effort exploring two photon autofluorescent imaging for malignancy detection. He aims to become a practicing physician and innovator with the goal of development and clinical translation of real-time, patient-specific, imaging tools for early-cancer detection. His specialty interests include radiation oncology and interventional radiology.

This month, the Society is awarding \$323,000 in scholarships to 74 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Successful applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by SPIE Senior Member **Brian Primeau**.

Since this program began in 1978, SPIE has distributed more than \$7.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education as well as to the future generations of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, we have invested more than \$25 million in the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
