## Morgan Choi awarded a Women in Optics Scholarship by SPIE

BELLINGHAM, Washington, USA — **Morgan Choi** has been awarded a 2025 Women in Optics Scholarship by SPIE, the international society for optics and photonics, for potential contributions to optics, photonics, or a related field.

Choi is a PhD student at the University of Arizona's Wyant College of Optical Sciences, where she works in the Quantum Optomechanics Group under Assistant Professor **Dalziel Wilson**. Choi studies quantum-inspired techniques to image nanomechanical resonators. In particular, she focuses on how information is encoded in light and employs spatial-mode demultiplexing for dynamic imaging at the quantum limits of sensitivity. "I am grateful for this scholarship," said Choi. "I deeply appreciate this investment in my education. This support helps make my research possible, so thank you for empowering women scientists. "

This month, the Society is awarding \$323,000 in scholarships to 74 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Successful applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by SPIE Senior Member **Brian Primeau**.

Since this program began in 1978, SPIE has distributed more than \$7.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education as well as to the future generations of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, we have invested more than \$25 million in the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development.
