Yuli Lu awarded an SPIE Optics and Photonics Scholarship

BELLINGHAM, Washington, USA — **Yuli Lu** has been awarded a 2025 Optics and Photonics Scholarship by SPIE, the international society for optics and photonics, for potential contributions to optics, photonics, or a related field.

Lu is an undergraduate in biophysics with dual degrees from Duke University (USA) and Duke Kunshan University (China). Her research focuses on biophotonics, optical trapping, and Raman Spectrum analysis such as SiGe alloys and nanoplastics. She is currently conducting her research under the direction of Professor **Domna Kotsifaki** and Professor **Changcheng Zheng**, focusing on the detection and chemical characterization of nanoplastics in water, using Raman spectrum analysis, optical tweezers, and machine learning. "I am committed to leveraging interdisciplinary approaches – combining physics, biology, and computational tools – to drive innovation in optical technologies," said Lu. "I plan to contribute to solutions for global scientific and healthcare challenges."

This month, the Society is awarding \$323,000 in scholarships to 74 outstanding SPIE Student Members, based on their potential contribution to optics and photonics, or a related discipline. Successful applicants were evaluated, selected, and approved by the SPIE Scholarship Committee, chaired by SPIE Senior Member **Brian Primeau**.

Since this program began in 1978, SPIE has distributed more than \$7.5 million dollars in individual scholarships. This ambitious effort reflects the Society's commitment to education as well as to the future generations of optical scientists and engineers around the world.

SPIE, the international society for optics and photonics, brings engineers, scientists, students, and business professionals together to advance light-based science and technology. The Society, founded in 1955, connects and engages with our global constituency through industry-leading conferences and exhibitions; publications of conference proceedings, books, and journals in the SPIE Digital Library; and career-building opportunities. Over the past five years, we have invested more than \$25 million in the international optics community through our advocacy and support, including scholarships, educational resources, travel grants, endowed gifts, and public-policy development. www.spie.org.
